

Dangerous Cold Advisory

Friday Afternoon 2/3/2023 through Sunday Morning 2/5/2023

The UNH Police Department-Division of Emergency Management is alerting the campus that Dangerously cold air will impact the region Friday through Saturday, with potential for the coldest temperatures since 2016. Northwest winds will gust over 30 mph causing brutally low wind chills. Friday into Saturday readings below -30F along the coast and below -45 F in the foothills and mountains.

Personal Care

<https://www.weather.gov/safety/cold>

The following is a list of general recommendations when dangerous cold weather is present:

1. Campus community members should avoid excessively long exposure to the extreme cold. Dress appropriately and cover exposed body parts including your face, head and hands.
2. Make sure you layer your clothing, and your feet are covered warmly. Keep your feet dry by wearing the appropriate footwear. Wear footwear that provides you good traction.
3. Leave early to get to your destinations so you are not rushing.
4. If walking across campus, stop inside heated buildings to warm up.
5. Consider using campus public transportation, when possible.

Please close windows in your room and office. This will help us avoid frozen pipes and water damage.

The UNH Police Department Emergency Dispatch Center is open 24/7.

- For emergencies call **911**
- For non-emergency questions call **603-862-1427 (UNH, UNHM, UNH Law)**
- For maintenance issues call **603-862-1437 (Durham campus ONLY)**
